Appointment of Michel Vanhaesbroucke as Group Marketing Director

Paris, 1 September 2026 – GTT, the technological expert in membrane containment systems used to transport and store liquefied gases, announces the appointment of Michel Vanhaesbroucke as Group Marketing Director and member of the Executive Committee.

In his new role, Michel Vanhaesbroucke will be responsible for strengthening GTT's strategic positioning in its historical markets and supporting the development of the Group's new activities, at a time when the maritime transport and energy sectors are undergoing profound transformations. In particular, he will contribute to strengthening the range of services offered to ship-owners and charterers, as well as to developing the portfolio of digital solutions. To support these priorities, he will lead the Group's marketing, market intelligence, offer development and commercial support strategies.

A graduate of École Polytechnique and École nationale des ponts et chaussées, Michel Vanhaesbroucke has more than thirty years of experience in senior management positions within major industrial and energy groups. He spent most of his career at ENGIE, before moving to EDF and, more recently, to John Cockerill, where he served as Chief Strategy and Business Development Officer. His areas of expertise include the development of international brands, the definition of growth strategies, the development of new markets, industrial partnerships, investment in innovative technologies, as well as supporting players engaged in the energy transition.

François Michel, Chief Executive Officer of GTT, said: *"We are very pleased to welcome Michel Vanhaesbroucke to the Group. His extensive experience within major international groups, his strategic vision and his in-depth knowledge of the challenges of the energy transition are major assets in supporting GTT's growth and accelerating the development of our activities across all our markets."*

About GTT

GTT is a technology and engineering group with expertise in the design and development of cryogenic membrane containment systems for use in the transport and storage of liquefied gases. Over the past 60 years, the GTT Group has designed and developed, to the highest standards of excellence, some of the most innovative technologies used in LNG carriers, floating terminals, onshore storage tanks and multi-gas carriers. As part of its commitment to building a sustainable world, GTT develops new solutions designed to support ship-owners and energy providers in their journey towards a decarbonised future. As such, the Group offers systems designed to enable commercial vessels to use LNG as fuel, develops cutting-edge digital solutions to enhance vessels' economic and environmental performance, and actively pursues innovation in the field of low-carbon solutions.

GTT is listed on Euronext Paris, Compartment A (ISIN FR0011726835 Euronext Paris: GTT) and is notably included in the CAC Next 20, SBF 120, Stoxx Europe 600 and MSCI Small Cap indices.
