

## GTT Group ranks first among mid-sized companies in the 2025 INPI patent filings

**Paris, 3 March 2026** – The GTT Group, technological expert in membrane containment systems used to transport and store liquefied gases, announces that it filed 68 patent applications with the French National Institute of Industrial Property (INPI) in 2025, ranking first among mid-sized companies (ETI) for patent filings. GTT also maintains its 23rd position in the overall INPI ranking, confirming the consistency of its innovation strategy, driven by the excellence of its engineering teams.

By allocating nearly 10% of its annual revenue to research and development, the Group is implementing an ambitious technology roadmap aimed at consolidating its leadership in the historical LNG<sup>1</sup> carrier market, while accelerating its expansion into adjacent segments such as LNG as fuel and low-carbon solutions.

In an environment shaped by evolving regulatory frameworks and rising energy transition ambitions, GTT leverages its expertise and innovation capabilities to deliver best-in-class technological solutions, combining safety, energy performance and environmental footprint optimisation.

Building on sustained investment in R&D and a steadily expanding patent portfolio, the Group intends to support the ongoing transformation of the energy and maritime value chains.

**François Michel, Chief Executive Officer of GTT, commented:** *“Innovation lies at the heart of our identity and long-term strategy. It is built upon the expertise, commitment and creativity of our engineers, who underpin our technological excellence. We are proud to contribute to industrial competitiveness alongside the other companies featured in this ranking.”*

<sup>1</sup> Liquefied Natural Gas

## About GTT

GTT is a technology and engineering group with expertise in the design and development of cryogenic membrane containment systems for use in the transport and storage of liquefied gases. Over the past 60 years, the GTT Group has designed and developed, to the highest standards of excellence, some of the most innovative technologies used in LNG carriers, floating terminals, onshore storage tanks and multi-gas carriers. As part of its commitment to building a sustainable world, GTT develops new solutions designed to support ship-owners and energy providers in their journey towards a decarbonised future. As such, the Group offers systems designed to enable commercial vessels to use LNG as fuel, develops cutting-edge digital solutions to enhance vessels' economic and environmental performance, and actively pursues innovation in the field of low-carbon solutions.

GTT is listed on Euronext Paris, Compartment A (ISIN FR0011726835 Euronext Paris: GTT) and is notably included in the CAC Next 20, SBF 120, Stoxx Europe 600 and MSCI Small Cap indices.
