

GTT to design a 10,000 m³ onshore storage tank for an LNG liquefaction plant in China

Paris, 8 April 2026 - GTT announces that it has received an order from Beijing Petrochemical Engineering Co., Ltd., in cooperation with Shaanxi Yanchang Petroleum & Natural Gas Co. Ltd., for the design of a 10,000 m³ onshore LNG tank to be built at the Yangjiawan Liquefied Natural Gas (LNG) liquefaction plant, in Yan'an city, Shaanxi Province, China.

For the first time, a GTT's membrane technology will be deployed alongside an onshore LNG liquefaction plant. This configuration represents a significant step forward for small-scale LNG infrastructure, which requires optimised energy performance due to the limited land footprint.

The tank will be equipped with GTT's GST[®] membrane full containment technology, providing an effective and adapted response to these constraints. This technology features optimised insulation, achieving thermal performance up to twice that of conventional onshore tanks. In addition, an integrated monitoring system enhances storage safety.

Delivery of the tank is scheduled for the fourth quarter of 2027.

About GTT

GTT is a technology and engineering group with expertise in the design and development of cryogenic membrane containment systems for use in the transport and storage of liquefied gases. Over the past 60 years, the GTT Group has designed and developed, to the highest standards of excellence, some of the most innovative technologies used in LNG carriers, floating terminals, onshore storage tanks and multi-gas carriers. As part of its commitment to building a sustainable world, GTT develops new solutions designed to support ship-owners and energy providers in their journey towards a decarbonised future. As such, the Group offers systems designed to enable commercial vessels to use LNG as fuel, develops cutting-edge digital solutions to enhance vessels' economic and environmental performance, and actively pursues innovation in the field of low-carbon solutions.

GTT is listed on Euronext Paris, Compartment A (ISIN FR0011726835 Euronext Paris: GTT) and is notably included in the CAC Next 20, SBF 120, Stoxx Europe 600 and MSCI Small Cap indices.
