

GTT entrusted by Hanwha Ocean with the tank design of two new LNG Carriers

Paris, 31 March 2026 – GTT announces that it has received, in the first quarter of 2026, an order from the shipyard Hanwha Ocean for the tank design of two new Liquefied Natural Gas Carriers (LNGCs).

GTT will design the cryogenic tanks of the vessels, each offering a total capacity of 174,000 m³. The tanks will be fitted with the NO96 Super+ membrane containment system, a technology developed by GTT.

About GTT

GTT is a technology and engineering group with expertise in the design and development of cryogenic membrane containment systems for use in the transport and storage of liquefied gases. Over the past 60 years, the GTT Group has designed and developed, to the highest standards of excellence, some of the most innovative technologies used in LNG carriers, floating terminals, onshore storage tanks and multi-gas carriers. As part of its commitment to building a sustainable world, GTT develops new solutions designed to support ship-owners and energy providers in their journey towards a decarbonised future. As such, the Group offers systems designed to enable commercial vessels to use LNG as fuel, develops cutting-edge digital solutions to enhance vessels' economic and environmental performance, and actively pursues innovation in the field of low-carbon solutions.

GTT is listed on Euronext Paris, Compartment A (ISIN FR0011726835 Euronext Paris: GTT) and is notably included in the CAC Next 20, SBF 120, Stoxx Europe 600 and MSCI Small Cap indices.
